DETAILED ACTION

Withdrawal of Finality

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Cardillo, IV et al. (US Pat. No. 5,937,041).

According to the specification on page 9, lines 5-13, the claimed “switching instruction” is equivalent to an acknowledgement signal sent from server 13 indicating that the request

Art Unit: 2662

designating a specific site has been received and understood. Therefore, examiner interpretes the claimed "switching instruction" as the " acknowledgement signal sent from the server".

In claims 1, 2, Cardillo, IV et al. discloses, in Fig.1, a CPE 110 (telephone installation) comprising ADSL compatible device (data terminal) or screen-display telephone connected to Worldwide web 140 (internet) via PSTN 120. See col.5, line 45 to col.6, line 5. Refer to fig.4, upon receiving a request from a user to access an Internet site, a "Well come" message comprises a homepage from which the users begins their Internet access is displayed on screen 111 of CPE 110. From the Homepage, the user is permitted to select an Internet site such as Yahoo site. Once the site selection has been made, a network application vehicle (NAV) 130 retrieves the data file from the selected site and transmit it to the CPE 110 (acknowledgement /switching instruction transmitted from server). See col.7, line 50 to col.8, line 15.

Allowable Subject Matter

Claims 4-12 are allowed.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In claim 3, the prior art does not disclose means for receiving switching instructions via telephone network and wherein the the switching circuits are adapted to be controlled by the means for receiving the switching instructions.

Response to Arguments

Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vaziri et al. (US Pat. No. 6,377,570 B1) discloses Internet Switch Box, System and Method for Internet telephony.

Sassin et al. (US Pat. No. 6,249,576 B1) discloses Telephone Directory Information System with Call Placement Capability.

Tomby et al. (US Pat. No. 6,515,996 B1) discloses Modem with IP Support.

Carmello et al. (US pat. No. 6,425,000 B1) discloses System and Method for Triggering Actions at a Host Computer by Telephone.
